Introducing De-Carbo: Innovative packaging solutions

Eco-friendly and efficient design: De-Carbo's plastic sleeve pack is made from more than 70% recycled materials, embodying our commitment to sustainability. Lightweight yet robust, these sleeve packs help reduce transportation and logistical costs. Designed for efficiency, they can be easily folded for space-saving storage when not in use.

Optimized for loading and handling: De-Carbo increases loading capacity due to its light weight. De-Carbo can be snugly fitted into trucks and containers, optimizing space without gaps and enhancing loading efficiency. It can be stacked in tiers of up to three, allowing for compact packaging of goods weighing up to 1 ton. This structured design facilitates the handling of goods previously constrained to flat storage, making De-Carbo ideal for diverse logistical requirements.

eco friendly

The sleeves are made of recycled material, with more than 70% recycled material.

Simple Structure

Simple structure of pallet + sleeve + lid. Can be folded for storage, when not in use or when in storage.

References

The product has specifications adopted by Japanese car manufacturers, semi-conductor manufacturers & military.

Customizable height and interior

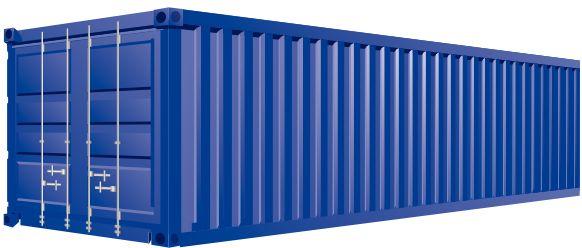

Height & interior can be customized, depending on your needs, to fit the useage

Size Specification

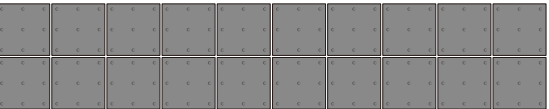

De-Carbo Capatch
Pallet-mounted containers
